WOMEN EMPOWERMENT AND HIGHER EDUCATION

BACKGROUND:

Gender Issues are intertwined in social, political, economic and environmental spheres of any country and have been widely discussed at the international and national level in the recent past. In the backdrop of new economic policy the gender gaps in various indices of development have widened and social inequalities have deepened in numerous ways. Education is the only way to strengthen the Women power in all these spheres. The need of the hour is to bring about true socio-economic empowerment of women and it is possible only through skill based education to women.

This conference is an attempt to identify the “Role of Higher Education and women Empowerment” and hopes to have inputs from academicians, voluntary agencies, the government officials, policy makers and women themselves.
